PERSONAL PROJECTS

VITE E-COURSES

Developed a dynamic Online Courses Platform using React.js, Tailwind CSS, and HTML5 with JSX for building an intuitive and responsive user interface. The project features: Routing, React Hooks: like useState, useEffect, and useContext. Custom JSON Data: Created and integrated sample JSON data to populate course and tutor details .Reusable Components: Designed modular components for headers, footers, and course cards to maintain consistency and scalability.In-Built React Functions:

MOVIE HUNT - MOVIE DETAILS WEBSITE

Developed a feature-rich Movie Search Application using React.js, Bootstrap 5, CSS, and HTML5 with JSX for an intuitive and responsive user interface. The project highlights include: Routing: Enabled smooth navigation between search results and detailed movie information . React Hooks , API Integration: Consumed a public movie API to fetch and display movie data, including titles, posters, descriptions, and ratings.Dynamic Linking: Integrated external links directing users to the IMDb page of selected movies.

PERFUMY - PERFUME WEBSITE

Developed a sleek Perfume E-Commerce Application using React.js and Tailwind CSS, featuring a responsive and visually appealing design. Implemented React Router for navigation, React Hooks for state management, and dynamic rendering using sample JSON data for product details, ratings, and reviews. Designed interactive UI components for seamless browsing of perfumes and detailed views, ensuring an intuitive user experience.
